EDUCATION

Lebanese American University (LAU) <i>Bachelor of Computer Science (2022 – 2025)</i>	2022 – 2025
Saint Coeur Kfarhabab School <i>TSG Lebanese Baccalaureate</i>	2007 – 2022

WORK EXPERIENCE

Murex – Beirut, Mint L Hosn

Intern Software Engineer (IS Dev-AI Team)

June 2025 – August 2025

- Gained hands-on experience by building and testing **AI automation workflows**, exposing me to applied AI systems in a production environment.
- Supported **data ingestion pipelines** used by AI agents, including document preprocessing and structured data handling.

Murex – Beirut, Mint L Hosn

Part-Time Software Engineer (IS Dev-AI Team)

October 2025 – December 2025

- Designed and maintained **automation workflows using n8n** to support AI-driven systems, including data ingestion and retrieval pipelines.
- Worked on **RAG and GraphRAG workflows**, handling document processing, embedding generation, indexing, and retrieval logic.
- Integrated external APIs and internal services into AI pipelines, ensuring correct data flow and error handling.

PROJECTS

Bewe Partners CRM – Salon Management Platform

- Built a pixel-perfect, multi-tenant CRM for salons to manage bookings, staff, services, and customers – **React + TypeScript + TailwindCSS** frontend, **FastAPI** backend, and **Supabase (PostgreSQL)** for authentication, data, and row-level security.
- Built a separate CMS admin portal to provision salons and owner accounts; deployed the frontend and CMS on **Vercel** and the FastAPI backend on **Render**.

LikeMinded – Personality-Based Dating Platform

- Co-developed a personality-driven matching platform focused on compatibility over appearance. Frontend built using **React.js**; and backend using **FastAPI** with **Supabase (MySQL)**, implementing a matching algorithm, and conversation/chatting system.

LikeMinded Mobile – iOS & Android App

- Built the cross-platform mobile app with **React Native (TypeScript)**, extending the personality-based matching platform to **iOS and Android** on the shared **FastAPI** and **Supabase** backend.
- Implemented native **Google and Apple authentication**, camera-based **KYC identity verification**, a chatbot-driven personality assessment, **push notifications**, and a real-time conversation system.

AI Automated CV Checker

- Designed and implemented **automation workflows using N8N** to ingest CV documents, preprocess content, and store embeddings in a **Qdrant vector database**.
- Built **retrieval pipelines** to match CVs against job requirements and feed relevant context to a chatbot for candidate-role fit analysis.

Grab n Go Website (Restaurant Website)

- Developed a fully responsive restaurant website with an interactive menu, admin page, and user-friendly design using **PHP, Laravel, HTML, CSS, JavaScript, and MySQL**.

Forum Page

- Built a dynamic forum platform supporting threaded discussions with intuitive UX and scalable backend architecture using **Laravel, PHP, and HTML**.

SKILLS

Programming Languages & Frameworks: Java, Python, FastAPI, SQL, HTML, CSS, React, JavaScript, PHP, Laravel

Tools & Software: N8N, Neo4j, MongoDB, MySQL, Qdrant, GitHub, PowerPoint, Supabase, Vercel, Render

Languages: English (fluent), French (fluent), Arabic (native)
